

Since other modifications and changes varied to fit particular operating requirements and environments will be apparent to those skilled in the art, the invention is not considered limited to the example chosen for purposes of disclosure, and covers all changes and modifications which do not constitute departures from the true spirit and scope of this invention.

Having thus described the invention, what is desired to be protected by Letters Patent is presented in the subsequently appended claims.

What is claimed is:

1. A rocking chair slipper for placing over the rocker foot of a rocking chair to protect

the floor, comprising:

a fabric slipper that stretches all ways to expand to fit and conform to the shape and length of a standard rocking chair rocker foot;

an elastic strip that is attached all around the edge of the opening of the slipper to enable the slipper to stretch enough to fit over the rocker foot and then conform back to the shape of the rocker foot;

two fabric or ribbon strips eight inches in length attached to the opening of the slipper on both sides at two stragetic points, one at 8 inches from the front corner and one at 6 inches from the back corner of opening, to be tied into a bow around the rocker foot to keep the slipper in place;

a foam or other padding inserted between two layers of fabric on the bottom of the slipper to cushion the floor and rocker foot;

2. The rocking chair slipper in accordance with claim 1, wherein an elastic strip is attached all around the edge of the opening of the slipper to enable the slipper to stretch enough to fit over the rocker foot and then conform back to the shape of the rocker foot, further comprising two pieces of 1/2" wide elastic measuring 20" in length elastic strips.

3. The rocking chair slipper in accordance with claim 1, wherein said fabric or ribbon strips eight inches in length attached to the opening of the slipper on both sides at two stragetic points, one at 8 inches from the front corner and one 6 inches from the back

corner of opening, to be tied into a bow around the rocker foot to keep the slipper in place, further comprising two eight inch lengths of ribbon or similar material fabric ties.

4. The rocking chair slipper in accordance with claim 1, wherein said fabric must stretch all ways to expand to fit and conform to the shape and length of a standard rocking chair rocker foot, further comprises a four way stretch fabric 36" in length and x 12" wide that is folded in half and sewn in such a manner to form a slipper of stretch fabric.

5. The rocking chair slipper in accordance with claim 1, wherein said foam or other padding inserted between two layers of fabric on the bottom of the slipper to cushion the floor and rocker foot, further comprising a foam or other padding 1/2" thick by 2" wide by 30" long padding.

6. A rocking chair slipper for placing over the rocker foot of a rocking chair to protect the floor, comprising:

two pieces of 1/2" wide elastic measuring 20" in length elastic strips, for an

elastic strip that is attached all around the edge of the opening of the slipper to enable the slipper to stretch enough to fit over the rocker foot and then conform back to the shape of the rocker foot;

two eight inch lengths of ribbon or similar material fabric ties, for fabric or ribbon strips eight inches in length attached to the opening of the slipper on both sides at two stragetic points, one at 8 inches from the front corner and one 6 inches from the back corner of opening to be tied into a bow around the rocker foot to keep the slipper in place, rigidly connected to said elastic strips;

a four way stretch fabric 36" in length and 12" wide that is folded in half and sewn in such a manner to form a slipper of stretch fabric wherein the fabric must stretch all ways to expand to fit and conform to the shape and length of a standard rocking chair rocker foot; and

a foam or other padding 1/2" thick by 2" wide by 30" long padding, for foam or other padding inserted between two layers of fabric on the bottom of the slipper to cushion the floor and rocker foot, rigidly connected to said stretch fabric.

7. The rocking chair slipper as recited in claim 6, further comprising:

a decorative gathered trim such as lace or other decorative trim, for a gathered lace or other trim attached to the opening of the slipper for decorative purposes, rigidly connected to said fabric ties, and rigidly connected to said stretch fabric.

8. The rocking chair slipper as recited in claim 6, further comprising:

a ribbon or similar fabric tied into a bow and sewn on to the front of the slipper wherein the bow is for decorative purposes only.

9. The rocking chair slipper as recited in claim 7, further

comprising:

a ribbon or similar fabric tied into a bow and sewn on to the front of the slipper for decorative purposes only.

10. A rocking chair slipper for placing over the rocker foot of a rocking chair to protect

the floor, comprising:

two pieces of 1/2" wide elastic measuring 20" in length elastic strips, for an elastic strip that is attached all around the edge of the opening of the slipper to enable the slipper to stretch enough to fit over the rocker foot and then conform back to the shape of the rocker foot;

a decorative gathered trim such as lace or other decorative trim, for a gathered lace or other trim attached to the opening of the slipper for decorative purposes;

two eight inch lengths of ribbon or similar material fabric ties, for fabric or ribbon strips eight inches in length attached to the opening of the slipper on both sides at two strategic points, one at 8 inches from the front corner and one 6 inches from the back corner of opening to be tied into a bow around the rocker foot to keep the slipper in place, rigidly connected to said lace or other decorative trim, and rigidly connected to said elastic strips;

a ribbon or similar fabric tied into a bow and sewn on to the front of the slipper bow, wherein the bow is for decorative purposes only;

a four way stretch fabric 36" in length x 12" wide that is folded in half and sewn in such a manner to form a slipper of stretch fabric wherein the fabric must stretch all ways to expand to fit and conform to the shape and length of a standard rocking chair rocker foot, rigidly connected to said lace or other decorative trim; and
